

## Gas Guide Kit

Part No. GP3001A-Z

### Key Benefits

Kit includes Circle Guide, Roller Guide, Radius Bar, Magnetic Pivot, Bevel Attachment, Stabilizer, Link Nut, Straight and Offset Pin, all packed in sturdy case with Product Manual

Rapid accurate cutting with absolute control on height and position

Use Multi-Fit GP3001Z where no match is found for torches up to 18mm (11/16") nozzle OD with 12mm (1/2") parallel section under retainer nut

**At Home Page on website use [Buy Online](#) or [Find Distributor](#) to source product**

Tanjant's Gas Guide Kit improves cutting operations from the first use, for almost any workshop cut requirement. The profiled Brass Bush is factory fitted and tested for smooth turning. Use either the straight or offset pin as the pivot point and start with the rail frame under the torch handle, pierce the plate and then rotate the frame to cut around the full circle. See more with How-to-Use feature on website.

The Bevel attachment enables heavy chamfer weld edge preparation on straight line or arcs. The Kit Manual has detailed drawings on each operation.

Each Kit has both Roller and Bush profiled to match a specific Gas Torch. Use the Torch Look-Up feature on the Tanjant website to select Torch Brand and Model. The search result will display the correct Part No for the Guide Kit suited to your torch
