

Trakka Line Cutter

Part No. TJ5085H1A to TJ5085H3Z

Key Benefits

Rapid accurate cutting with absolute control

Angle adjust for square/bevel edge

Bush profile fits to torch head

Base Footprint - slide to adjust

Powerful base magnets hold secure

New: Postal Shipment Pack includes 2 Rails 675mm (2'2") length and precise Alloy Joiner (1.35m total)

Tanjant's Trakka Line Cutter improves cutting operations from the first use. The adjustable trolley frame and wheels run smoothly to give clean cut edges every time. Magnet Bases slide and twist-lock. Ease back and rail will slide along the bases for extra cut length (up to 1.8m or 6') or offset cutting on a bench stop.

Each Bushing and Holder combination is profiled to match a specific Gas or Plasma Torch. Use the Torch Look-Up feature on the Trakka webpage to select Torch Brand and Model. The search result will display the correct Part No for the Trakka suited to your torch, including Holder & Bush. See more on website.

Bevel cutting is so easy - Holder Arm swings out for angle and up or down for tip clearance. Also great for fine adjustment kerf-cut angle compensation

The Trakka Line Cutter can be tailored to suit most requirements by adding extra lengths and accessories. Originally designed to cut 1.2m (4') plate out of rack storage, it offers the versatility to cover all workshop applications. Ideal for site-work and short cutting runs. Adjust frame tension to set smooth roll speed.
